

It's elemental..

Xenemetrix
The Power to Change Energy Into Information

Issue 1
March 2013

Approaching the end of 2013 first quarter, Xenemetrix is continuing to lead the Energy-Dispersive X-Ray Fluorescence (EDXRF) systems market.

We proudly present our first issue of Newsletter, which will be our platform to update you with our latest product innovations and improvements, upcoming events and updates.

We would like to welcome you to our new website at: www.xenemetrix.com. We hope that this new-look website will be easier to use and more convenient for you. We will gladly receive your comments and suggestions.

In addition, we would like to hear your success stories and evidences, and ultimately to publish them here.

Yours,
Xenemetrix Team

Events

Solution Highlight

Xenemetrix Proudly Presents: New Petro-Marine Solution

The powerful Energy Dispersive X-ray Fluorescence (EDXRF) analyzers of Xenemetrix are capable of more sensitive and precise analysis than can be expected from a laboratory class analyzer.

The Petro-Marine analysis system is appropriate to be used onboard vessels, thanks to its robust design. The EDXRF technology allows an accurate percentage and sub percentage analysis, within 100 seconds, with very low operational costs and no need for sample preparations.

The Petro-Marine analyzer is designed to fulfill all key aspects of the marine fuels and oils industry. This includes: meeting the government regulations with regards to low Sulfur, and enhancing engine performance, avoiding engine failure at sea and minimizing operational costs.

The system provides a cost effective maintenance management tool that specifically designed to reduce the cost of operation and total cost of ownership, with returns of investment measured in a few months.

We are glad to invite you to visit us at the upcoming Pittcon 2013 conference.

Pittcon 2013 will be our platform for announcing our latest product innovations and showcasing our expanding portfolio of analytical technologies, all available in one brand.

We will present our advanced X-Calibur SDD and S-Mobile SDD systems, with our state of the art unique and new software: Easy nEXt, which supports the excellent Xenemetrix's nEXt package for elemental analysis.

Xenemetrix will present on a booth No. 3150.

Thank you visiting us at IsrAnalytica 2013.

We would like to thank all our visitors and partners visited us on IsrAnalytica 2013 in Tel-Aviv.

ISI, distributor of Xenemetrix solutions presented company's system and applications during the exhibition. We look forward to seeing you again soon finding the best solution for your elemental analysis needs with Xenemetrix products.

Next issue: New "Search Application" web based platform and the unbelievable new analysis range: Carbon (6) - Fermium (100).

Xenemetrix
The Power to Change Energy Into Information

Xenemetrix is a leading designer, manufacturer and marketer of Energy-Dispersive X-Ray Fluorescence (EDXRF) systems. With more than 30 years experience, Xenemetrix continues to develop highly innovative technologies and solutions suitable for

today's ever-growing analytical challenges. Xenemetrix combines the latest technological developments with innovative engineering, to provide cost-effective solutions to a wide range of industries and applications.
